DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 12 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Lindberg et al U.S. Patent Number 6,088,329.

Re Claim 1, figure 1 teaches the normal rate switch 14 (a first router module) having 1~#n (N1) signal input terminals, including #n+1 (M1 expansion input terminal) and #1~#n+m (M1+1 output terminals); it is inherent that the switch 14 includes a routing means for selectively switching the input terminal and expansion input terminal to the any one of the output terminal; subrate switch 12 (a second router module) having #1~#m input terminals (N2 & expansions input terminals) including #1~#m output terminals (M2 output terminals); it is inherent that the switch 12 includes a routing means for selectively switching the input terminal and expansion input terminal to the

any one of the output terminal; wherein the output of #n+1 of switch 14 is connected to #1 input terminal the switch 12 and the output #1 of switch 12 is connected to the input #n+1 of switch 14 (See col. 2, lines 12-51).

Re Claim 12, refer to Claim 1, wherein figure 1 teaches two switches 14 & 12 (n routers) and figure 3 teaches the substrate switch 12 having plurality of time switching modules 45 (p router modules) each having a plurality input/output terminals.

Re Claim 13, refer to Claim 1, wherein the input terminal includes the interface circuitry.

Allowable Subject Matter

3. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 9-11 are allowed.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
